

Quality Policy

Betim Química operates in the development, manufacture and commercialization of: Inks and Solvents for encoders; Performance Chemicals for industrial processes of machining, stamping, pickling, cleaning technical, parts protection, corrosion inhibitors and release agents; Inks and Cleaning Solutions for Cartridges and ecotank for inkjet printers.

The company recognizes the importance of quality in its products and business sustainability, through the QMS:

- Seek the synergy of processes as a way to add value to the organization's business and ensure profitability.
- Increase customer satisfaction by developing, producing, providing and innovating their products.
- Meet legal and other pertinent requirements of the organization.
- Provide resources for the development and training of its employees seeking the best practices and meeting the objectives.
- Continuously improve the QMS.
